Project Proposal: Campus Event Management App

Goal: Build a web app where students can register for campus events.

Deadline: The first working version is due on 30 November 2026.

Team: 4 members (1 frontend, 2 backend, 1 tester).

Deliverables: login module, event listing, registration, admin dashboard.

Risks:

1. The backend developer has exams in November, so work may be delayed.
2. The payment gateway integration is not yet finalised.
3. Requirements for the admin dashboard are still unclear.
